Federico Villagra

QA Automation Intern at EPAM Systems
Cordoba, Córdoba, Argentina

Summary

Software Engineering student working in QA Automation, with strong skills in testing frameworks and CI/CD pipelines.

Passionate about DevOps, cloud infrastructure, and continuous learning. Always aiming to improve software quality and delivery through automation and best practices.

Experience

EPAM Systems
QA Automated Testing in Java
February 2025 - Present (4 months)
Córdoba, Córdoba, Argentina

Currently participating in a professional training program focused on automated software testing with Java, applying best practices in test design and Agile methodologies.

Key activities:
• Developing and executing automated test scripts using Selenium WebDriver and Cucumber (BDD framework)
• Working with JUnit, Maven, and Git for test management and version control
• Applying a layered test architecture: Business, Utils, and Test layers
• Practicing clean code principles, modular design, and maintainable test structures
• Collaborating in an Agile environment with focus on continuous integration and quality assurance

Building strong foundations in test automation through hands-on projects and collaborative development.

Aerobics Center
Web Developer
December 2023 - December 2024 (1 year 1 month)
Córdoba, Córdoba, Argentina

Worked as a part-time Web Developer for an e-commerce platform focused on training and certifications for fitness, dance, and rhythm instructors.

Main responsibilities included:
• Creating and updating site content using WordPress, WooCommerce, and Elementor
• Developing custom features with PHP, including plugins and scripts
• Improving user experience and streamlining product management workflows
• Ensuring responsive design and SEO-friendly structures for new pages

This role required close collaboration with non-technical stakeholders to adapt the platform to educational needs.
